

This list is intended to be used as a starting point in researching railroad colors. Most of the original numbers are more than 50 years and used lead base pigments that are no longer available. Current paint codes are provided where know.

The major paint supplier to the railroads in that era was DuPont using their Duco and Dulux lines of paints. I have separated the type number from the color number in the spreadsheet to make it easier to cross-reference the colors.

This list was made possible by the help of John Lee using information that John and George Rust compiled over many years.

If you have any additions or corrections please send them to Tim Meyer at fl10wheeler@verizon.net
